The Legend!

NEPTUN T2000 WITH TELESCOPE RINSING.

A UNIT WITH ONE CLEANING CANISTER AND AN OPEN POST RINSING SYSTEM

Simply to use, space saving and very easy to clean.
Art. No. 1670

HYGIENIC DESIGN

With no undesirable rough edges, corners or crevices, the sealed construction of the unit, which corresponds to regulation DIN 6653-3, enables simple maintenance and cleaning.

CONNECTION HOSE

With an „Easy Click“ quick coupling and 3/8“ thread. KTW proven appliance with a swivel connection on the base.

TWO STEP HEAD VALVE

The patented two-step valve system for a perfect post rinse with fresh water. The glasses are rinsed inside only or inside and out at the same time depending on how far down you push the glass.

SOFT PADS

Perfectly protect glasses from shock or breakage.

NEPTUN T2000 is legendary!

The Spülboy Neptune T2000 with its open rinsing system has proven to be a very popular product. The clever precision of the water jets is indeed fun to watch! While using the telescopic post-rinser, fresh water automatically replenishes the wash canister section ensuring continuous freshness. It is also very suitable for small sinks and situations where space is an issue.

The models Neptune T2000, Twin-Go T and Twin-Go T portable are constructed according to DIN 6653-3 and fulfill by that the highest demands for hand operated glass cleaning systems. All systems are equipped with water connection hoses approved by KTW or alternatively conform to DVGW regulations.

Think twice!

TWIN-GO T & TWIN-GO T PORTABLE

THE TWO CANISTER SYSTEM WITH A CLOSED POST RINSING UNIT.

We recommend this unit in particular for flat leveled counter sinks.
Art-No. 1550

HYGIENIC DESIGN

Again no rough edges, corners or crevices. The patented closed base construction ensures good hygiene and ease of cleanliness while corresponding the high standards required by the German DIN 6653-3 standard.

CONNECTION HOSE

With „Easy Click“ you can connect your Spülboy in seconds. The ability of the connection to swivel allows it to be placed where you want it.

DOUBLE RING SHOWER

Triggered by the weight of the glass, the double ring shower gives you extra high power to rinse the glass thoroughly giving you a 100% hygienically clean result.

TWO STEP HEAD VALVE

The protected design of the Two Step upper head valve ensures perfect post-rinsing. The glasses can either be rinsed on the inside only (for dry/clean glasses or on the outside and inside simultaneously for normal rinsing after the wash.

The Twin-Go T Principle

The Allrounder! The Twin Go T model, with its double ring shower system gives you a powerful and robust rinse resulting in even better hygienic cleanliness. Furthermore, the strong 2-canister-system brings fresh water into the wash section as the telescopic post-rinser is used so that the wash water is frequently refreshed. All telescopic models are very suitable for glasses with a stem and base up to a height of 24cm which also get thoroughly rinsed.

All Round Comfortable and Safe

All Spülboy Classic Line products are hand made in Germany with safety and comfort of use in mind. E.g. By using good quality suction feet the unit remains in position. Also the soft rubber PVC canister rings as well as the soft pads protect against glass breakage.

100 % Flexibility

With the Spülboy portable dual canister system you can combine the principals of reliability, mobility, flexibility, ease of use, cleanliness and hygiene all in one. The ingenious waste and fresh water refill system allows you to wash glasses quickly, hygienically and economically anywhere, without the use of a sink while getting 100% crystal clean results.

When setting up the unit away from a sink all you need is a water supply.

Because of the waste water drain system the Spülboy portable system does not necessarily need a counter sink.
