

New design - Highest cleaning performance

Due to new legislation requirements and statutory changes regarding mandatory product information concerning detergent packaging we adjusted the labels of our SPÜLBOY glass- washing- tabs and SPÜLBOY sanitizing powder. Coming into force in Germany in 2015 we therefore present our detergents in a contemporary and fresh layout starting with the 1st of November 2014.

Filling quantity and chemical mixture remain unchanged.

Art. No. 2938 tabs

Art. No. 2910 powder

We can pressure!

On the basis of pressure increases in different regions of Germany and worldwide we have developed the 2- stepped high pressure head valve.

Another reason for this technical improvement is given by the fluctuating pressure in the event- and catering business. The new constructed valve 09/14 ensures a safe and problem-free after rinse process for your glasses up to a dynamic operating pressure of 8 bar.
