

SPÜLBOY® NU – THINK NU! CLEAN GREEN!

Well informed into the year 2015 – 26. Meeting of experts relating to beverage dispensing installations

Again this year representatives of industry, breweries, craft and technic met for the 26. edition of experts conference in Freising/ Bavaria. Lots of interesting lectures of important innovations and changes in the field of beverage dispensing installations made the Spülboy® participation worthwhile.

What kind of measures can be developed and encouraged by producers, distributors and gastro operators to guarantee the maximum of quality and hygiene? This was a recurring theme throughout the meeting.

Spülboy® wants to thank for the invitation and the lecturers, furthermore for interesting discussions and the encouragement to carry on our efforts to enhance our doing in settling 100% hygienic standards for manual glass scrubbing systems.

Not only the January can be gray!
